The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 8, 11 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Biji (EP 1,178,118) in view of Bailey's for reasons of record.

Applicant argues that the claims require that the biomass be in a dry state for pressing. This has been considered but is not persuasive. Biji at column 3, paragraph 0014 calls for drying of the biomass. Applicant argues that Biji is directed to washing cell walls with water to remove debris from the oil. This is not the only process contemplated in Biji. At column 3, lines 50-51 cold pressing is shown. The use of washing with water is disclosed to be optional (paragraph 0019-0020). Applicant argues that Bailey's uses an adsorbent to remove particulate matter such as pigments, soaps and phosphatides from the oil. But it is not seen that pigments, soaps and phosphatides are necessarily particulates. Applicant urges that if one used Biji with Baileys, it would change the principle of operation of Baileys'. This is disagreed with. It is known in the art that the refining of

edible oils utilizes multiple steps. It is seen that the cold pressing in Biji could also employ a bleaching step as a part of the refining process.

Claims 6, 7, 9, 10, 12-17 and 19-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Biji in view of Bailey's as applied to claims 1-5, 8, 11 and 18 above, and further in view of Martek (WO92.12711 or US 5,550,156) in view of Polman (GB 2,241,503) for reasons of record.

Applicants' arguments are directed to the rejection of the independent claim and so no additional response is needed for this rejection.

The obviousness-type double patenting rejection and the provisional rejection under 35 USC 103 has been obviated by the terminal disclaimer and by applicants response in the Remarks. Also the rejection of the claims over Kyle (WO 96/21037) in view of Pagliaro (4,465,699) has been dropped.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final

action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
